
Education

University of California, Irvine

UC Irvine School of Physical Sciences (September 2022 - June 2026)

B.A. Environmental Science & Policy; Specialized in **Geographic Information Systems (GIS)**.

Skills/Programs

- | | | |
|---------------------------------------|---|---------------------------------|
| - ArcGIS Pro | - Geospatial & image data analysis | - Vector & raster geoprocessing |
| - ArcGIS Online | - Inclusive scientific & technical communication | - Attention to detail |
| - ArcGIS Storymaps | - Systematic troubleshooting | - Collaborative colleague |
| - Tableau | | - Data management |
| - Microsoft Office | | - Spanish (conversational) |
| - Python, HTML, CSS (familiar) | | |
-

Relevant Work Experience

UC Irvine Charlie Dunlop School of Biological Sciences, Irvine Greenhouse

Intern - Campus as a Living Lab (September 2023 - June 2024)

Irvine, California

- **Collected and analyzed soil and water quality measurements** (pH, EC, TDS).
- Made different soil mixtures with gravel, peat, sand, dirt, etc, focused on the particular drainage and soil type needs for each plant.
- Designed and completed projects for local community outreach, fertilizer use efficiency, & propagation protocol development.

Monteverde Institute

Independent Student Researcher (May 2025 - June 2025)

Monteverde, Costa Rica

- **Identified, managed, and accurately recorded field data** along permitted trails.
- Professionally conducted field research while enduring uncomfortable and variable weather conditions during the wet season.
- Analyzed, documented, and presented findings to an audience of peers, community members, and field professionals.

Mel's Funway Park

Lead Bartender (Winter 2024 - 2025 & Winter 2025 - 2026)

Litchfield, NH

- Enthusiastically prepared and served alcoholic and non-alcoholic beverages.
- Trained crew members in sales techniques, interpersonal skills with customers, and general bar functions for optimal teamwork and success.
- Served and developed **positive and professional rapport with upwards of 15,000 customers** each night.

Other Employment & Relevant Experience

Pi Beta Phi Fraternity for Women

Director of Recruitment Events (December 2024 - December 2025)

Irvine, CA

- Responsible for **planning all social events** in Continuous Open Bidding (COB) and primary recruitment periods with two other recruitment team members.
- **Managed over 100 members through training** and active recruitment periods.
- Paired over 700 PNMs with approx. 100 active Pi Beta Phi members for 1-on-1 conversations during recruitment, keeping each persons' strict schedules, interests, and values into account for optimal recruitment experiences.

Mel's Funway Park

Park Shift Lead (July 2021 - September 2025)

Litchfield, NH

- Worked and trained new employees in all park retail operations, POS, and food service.
- Lead all operations in productivity, customer satisfaction, and sales.
- Managed inventories and shipments, professional customer rapport, and team morale

Pi Beta Phi, Fraternity For Women

Panhellenic Delegate (January 2024 - December 2024)

Irvine, CA

- **Assisted chapter executive board members in productivity** by carefully delegating appropriate Panhellenic meeting information.
- **Effective communication between leadership levels** avoided consequences such as fines and probational periods, making **attention to detail** and interpersonal skills productivity vital to the health of the entire California Eta chapter of Pi Beta Phi.

Ninja Warrior Fitness

Lead Aerial and Acrobatics Coach (June 2022 - January 2024)

Londonderry, NH

- Created and taught a comprehensive curriculum in aerial silk and hoop (Lyra) acrobatics for kids aged 7-13.
- Lead non specialized 'Ninja' classes, designing creative obstacle courses for children aged 2-12.
- Required enough strength to lift at least 75lb and to have advanced or professional aerial and acrobatics skill level.

Environmental Analysis Projects

Shifts in the California Snow-To-Rain Ratio

UC Irvine - May 2026 | ArcGIS Pro & ArcGIS StoryMaps | Vector and Raster Spatial Analysis

- **Analyzed and interpreted SSP3-7.0 GHG emission projections** to determine changes in California's snow-to-rain ratio and **help decisionmaking** in water management.
- Processed multidimensional precipitation and snowfall data, and calculated ratio metrics through raster analysis, zonal statistics, and Excel.

Navarretia fossalis Habitat Suitability and Availability in Future Climate Projection Scenarios in California, USA

UC Irvine - May 2026 | ArcGIS Pro | Vector & Raster Spatial & Image Analysis

- **Examined drought and temperature impacts on *Navarretia fossalis* habitat suitability** against three levels of temperature and precipitation IPCC projections.
- Synthesized spatial and climate analysis into 4 map products, **Excel data visualization**, and an 11 page research report.

Mapping Saprotrophic Mushroom Distribution Against Hydrological Basins in Costa Rica

UC Irvine - December 2025 | ArcGIS Pro | Vector Spatial Analysis

- Aimed to explore fungal order habitat preferences by analyzing distribution patterns.
- **Managed data using spatial joins and vector analysis** for observed species and hydrological basins.

Fertilizer Use Efficiency

UC Irvine - Fall 2023 | **Tableau** | Multivariate Data Visualization

- Measured EC, pH, and PPM using a Hanna Instruments Test Kit from a variety of plant species **to best determine fertilizer sustainability practices.**
